

htc

The Power of Connectivity

htc Strategy

Connectivity is the key

Htc Bridging the Technology and Solution Gap

htc

Deliver technology solutions that meet customer needs while generating demand for traffic from operators.

Operators

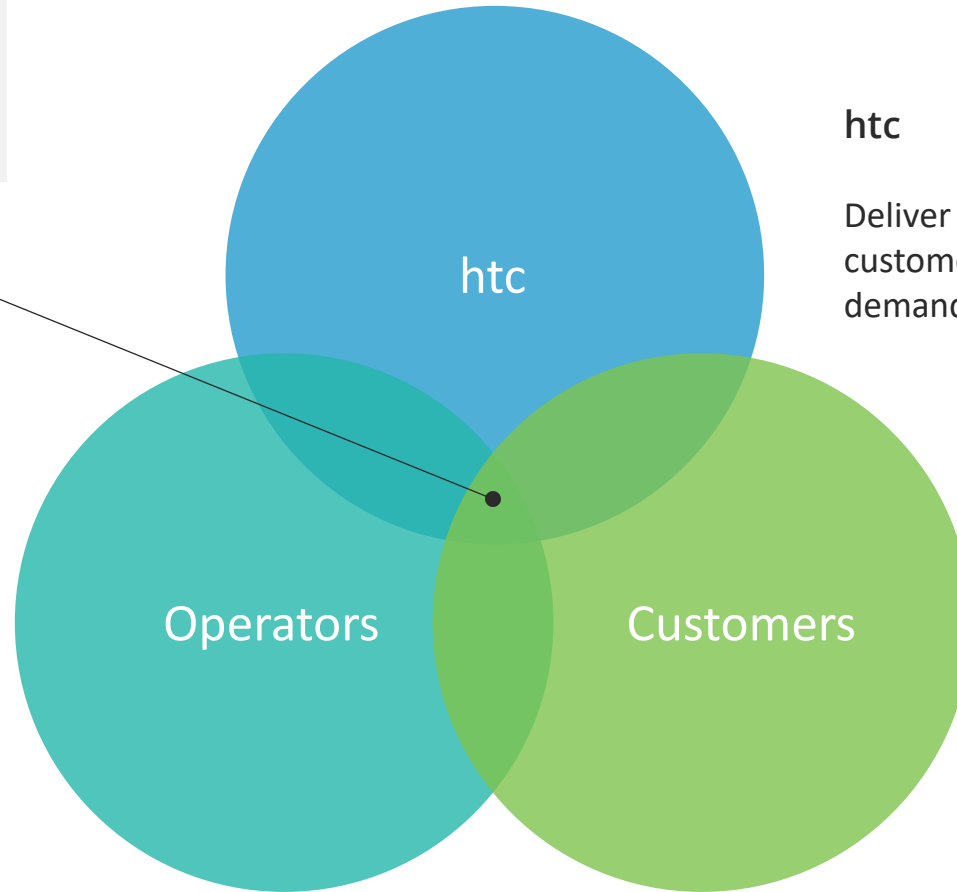

Offer traffic with the latest technology just focus to manage the network with minimum edge equipment to minimise the OPEX.

Operators

Customers

Customer

- Invested on the technology setup and need up and running services.
- Doesn't know the technology to invest correctly.
- Have security issue to use the new technology.

htc with operator

Deep knowledge with the operator technology, tested and certified solutions , bundle services with the operators to offer Managed service Solutions.

htc with Customers

Understand the current setup and technology, offer the solution regards less the operator technology to integrate and match the customer requirements.

htc manage service

Provide End to End services hassle free with Single Point of contact which provide long term relation with the customer.

“

htc

We deliver our customers
valuable, secure, and reliable
telecom solutions that
effectively meet their specific
needs and bridge the
technology gap in the market

Where we come from

htc Journey

htc timeline

Since 1994 until 2022

1994

First Cloud service

Offer **Worldspan** ticketing system as service in the kingdom to travel agenises over STC legacy technology X.25 and connected with the world servers 700+ agenises

1998

First DID/DOD Service

STC reach out to htc resolve the distance issue to serve the customers with E1, htc use the pregain solution and serve more than 2500+ key customer

2002

First MPLS Technology

We have reseller agreement with STC to serve the customer with MPLS and connect their head office with the branch office through our solutions 300+ branches

2009

First SIP Trunk

We provided with STC the new technology for DID/DOD service the SIP trunk providing the solution to 450+ customer

2012 -2015

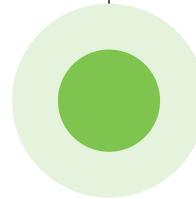

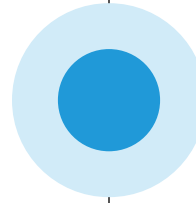

STC NGN Migration

Provide STC with the solution to migrate their Key customer from the DDN technology to NGN as MODA, RSAF, RSAD 1550+ Links

2016

STC Hazem Room

htc have been chosen by STC, MODA and RSADF to provide off hook service to all he remote areas during the Hazem War over different technologies IPMPLS, MW and VSAT over 500+ links

2022

STC Service concept and 2 contract

Work with STC to launch new service concept for Digital convertors over PLL service with the current to project to serve the key customer

Key customer Active equipment project (exclusive for htc)

Customer premises equipment project

The image features the HTC logo in white lowercase letters, centered within a large green circle. This green circle is surrounded by two concentric rings of teal and blue, creating a layered circular effect.

htc

Vision and Mission

Vision

centered around providing tailored solutions to our customers, aiming to address their unique needs and challenges. We are committed to delivering the best possible services and products, ensuring that they contribute to the enhancement of our customers' businesses and lives.

The background of the slide features three overlapping circles. The leftmost circle is a medium blue. The middle circle is a teal color. The rightmost circle is a light green and contains the text. The circles overlap in a way that creates a sense of depth and movement.

Mission

Our mission is to deliver advanced, high-quality communication technology services that enrich the quality of life and foster economic development in the communities we serve. We are committed to providing innovative solutions that positively impact the areas where we operate

htc Services

Main Business lines

Including Project Design, Supply, installation, testing and commissioning of E2E services. As NGN Project with STC

E2E Project

Manage the provided service to the customer as E2E starting from the link to CPE. AS Key customer Active Equipment

Manage Service

Internet of things for including the cloud setup and remote user equipment as Remote patient monitoring

IoT

htc Solution

Unlocking Potential with Advanced Technology

Standard projects are our foundation, **but breaking through limitations is our specialty.**

Managed WIFI

Design

Site-surveys to customize the Wi-Fi network design according to the topology of the building,

24/7 Support

Help desk and support of the network user.

Managed Network

install

Secure, efficient equipment installation according to pre-installation network design.

Monitor and Manage

remote monitoring, pro-active notification, and scheduled maintenance services

Managed Wi-Fi

cnPilot e425H / e430H

Wall plate 11AC wave 2
Multi-GE, PoE out, BLE, snap-on install
Wall mount, desk stand optional

Highest Tx power among competitive
Higher SNR = better experience

cnMaestro

Single Cloud Dashboard

Unlimited scalability from Cloud; 10,000 per instance on premises. Integrated Guest Access, Switch mgmt., AP mgmt., backhaul. Push firmware, provisioning, reporting and integrated Help Desk tools

XV2-2

Wi-Fi 6, 2x2

No premium for Wi-Fi 6

XV3-8

Wi-Fi 6, 8x8, SDR

High Density, Meeting Rms

XV2-2T

Wi-Fi 6, 2x2 Outdoor

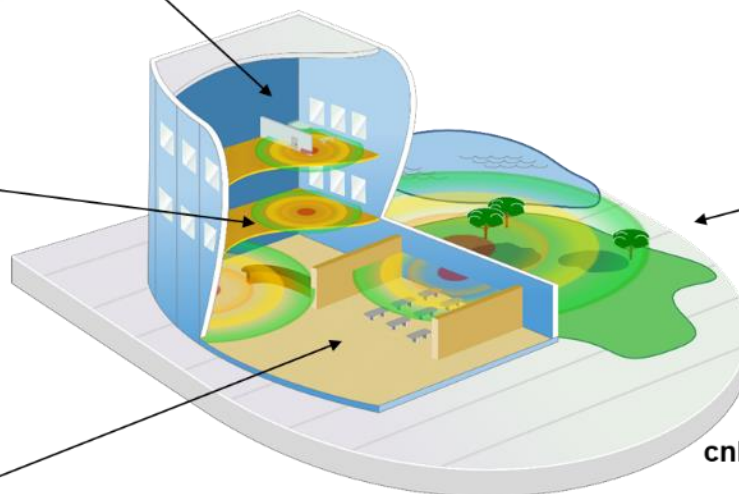

Integrated mounting

cnMatrix 2028P/2052P

24/48 GE, PoE+, 4 SFP+

Enterprise Ethernet with 10Gb fiber interconnects

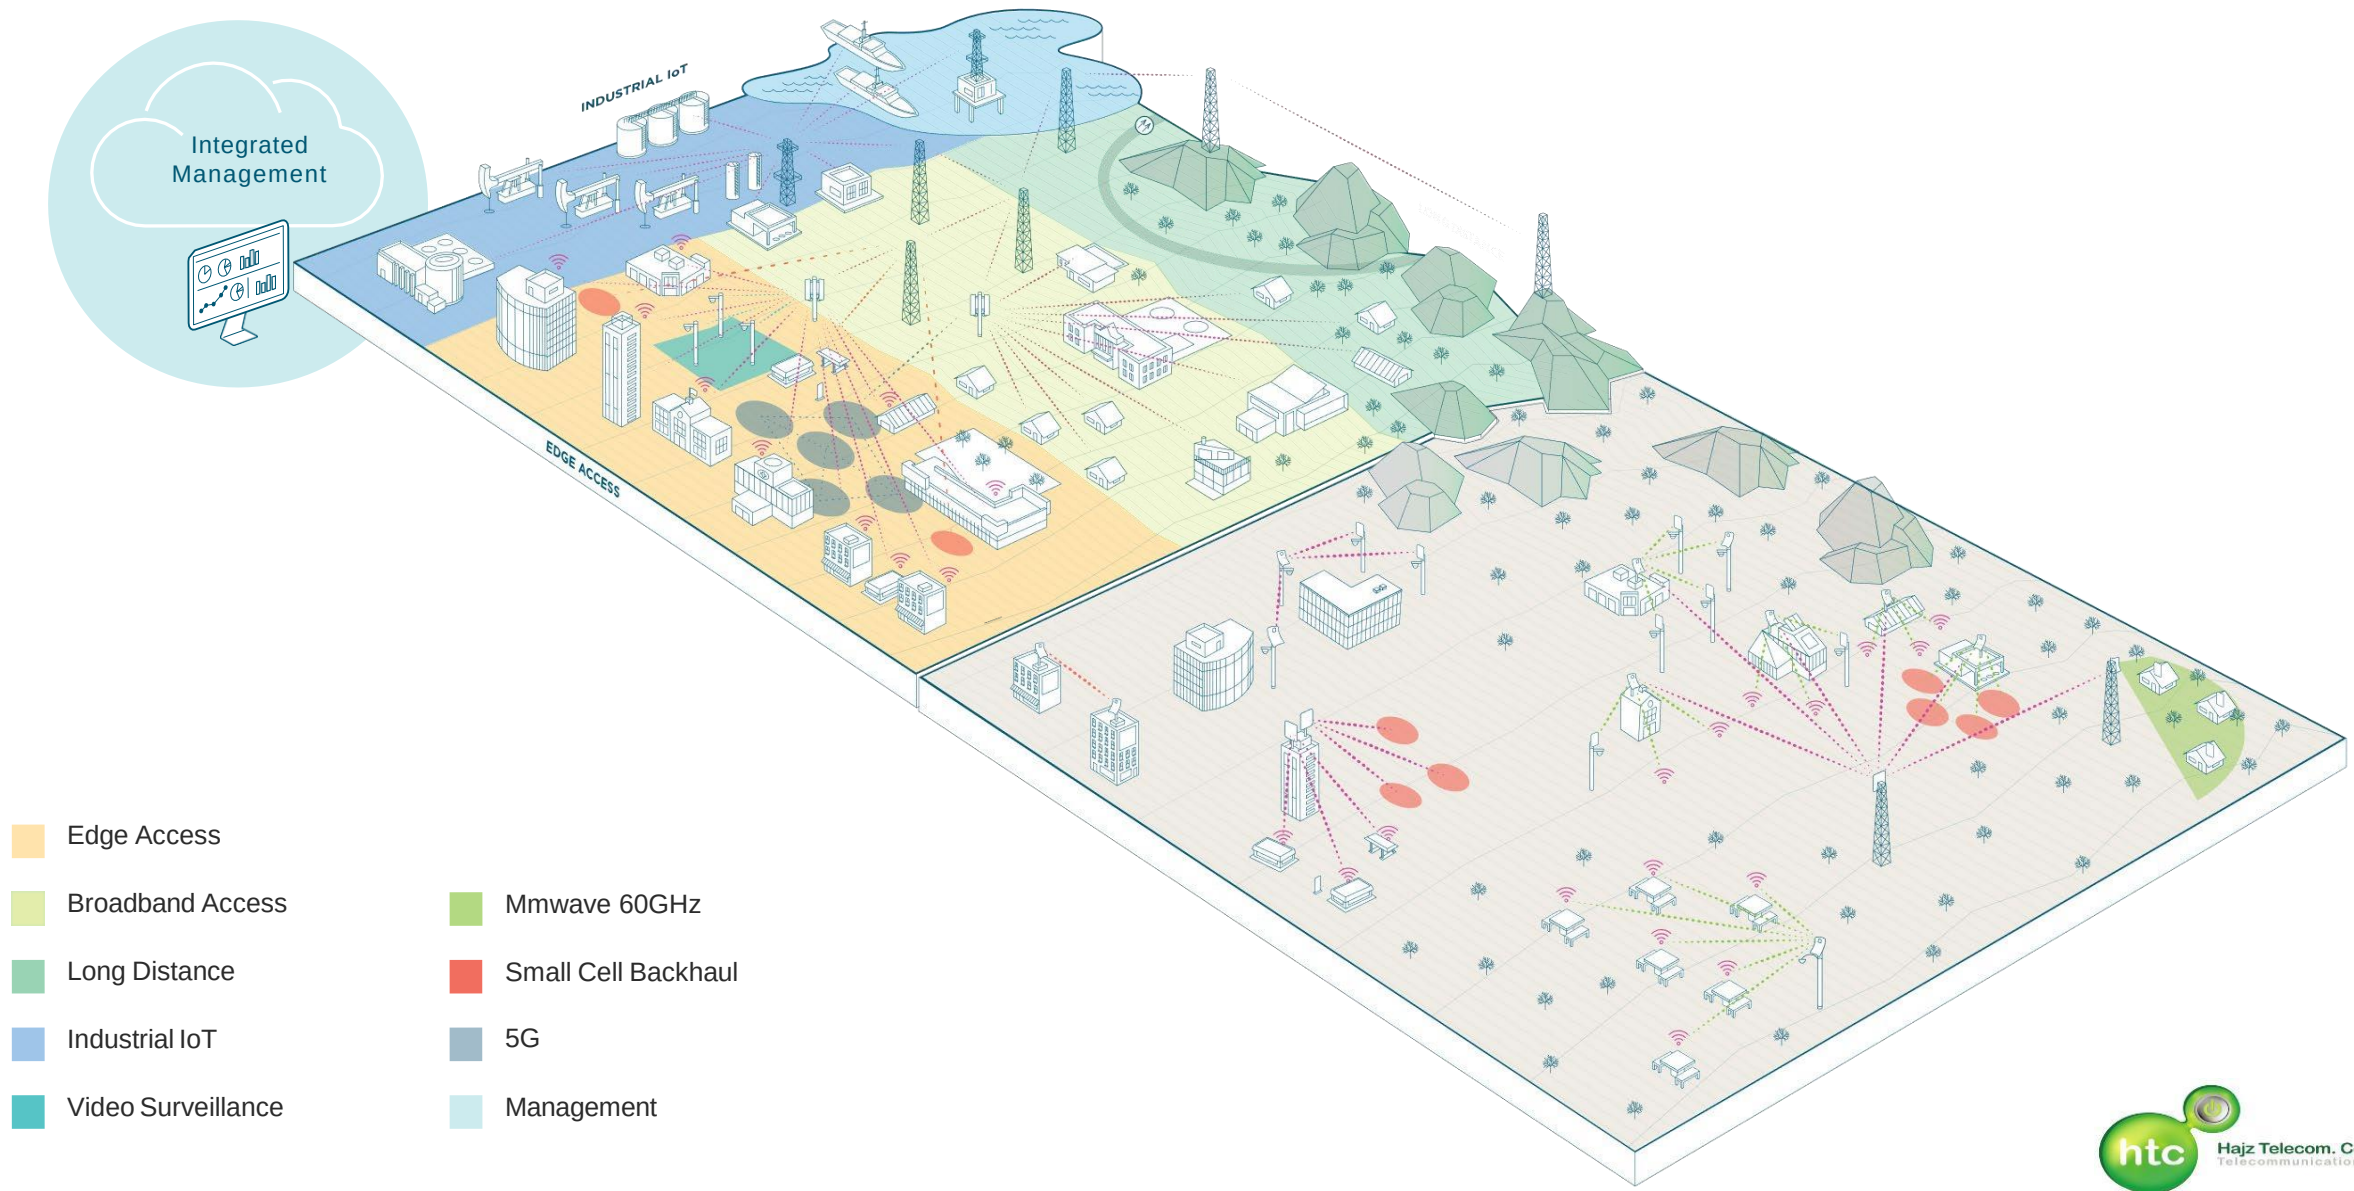

Managed Wi-Fi Monitor

- Centralized management
- Unlimited scalability
- High availability
- Feature rich user interface
- Elegant simplicity

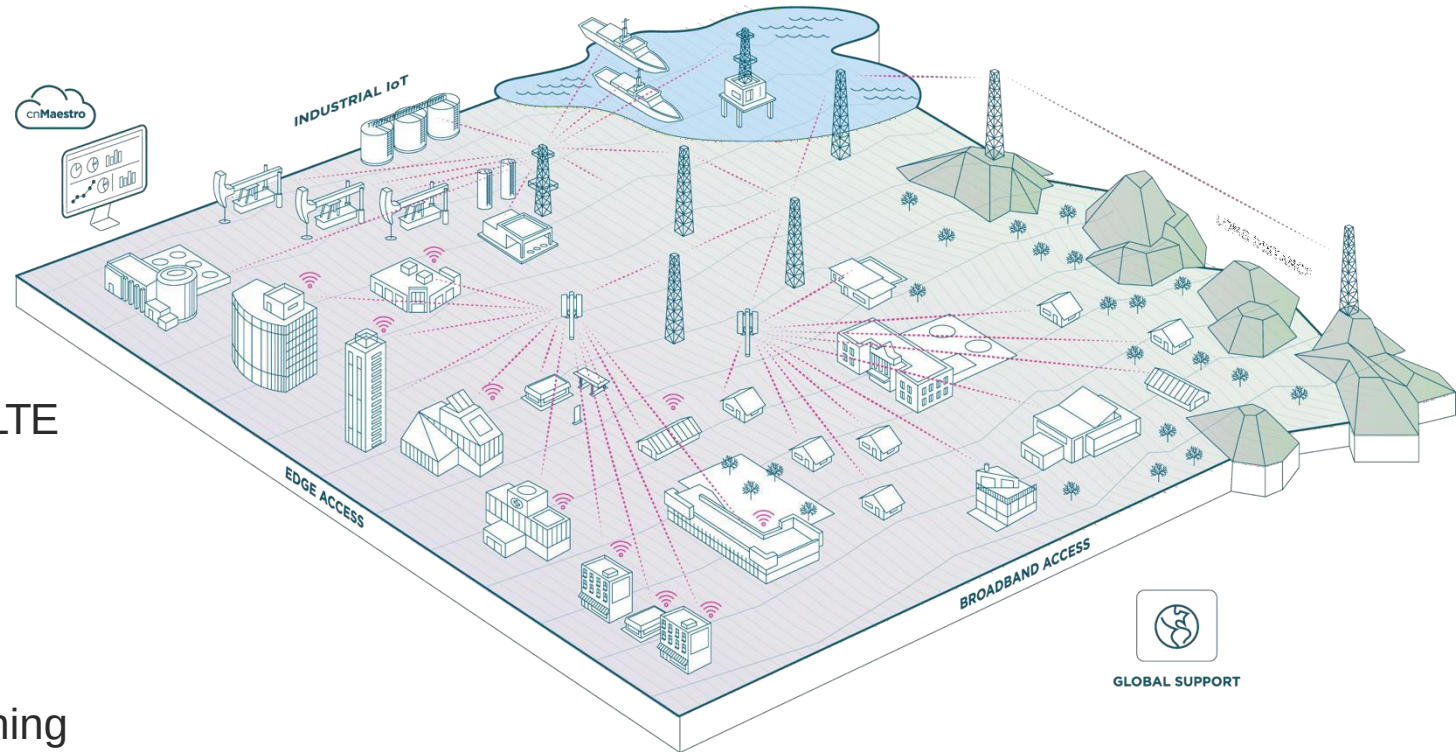

Managed Fixed Wireless Access

Network Wireless Fabric

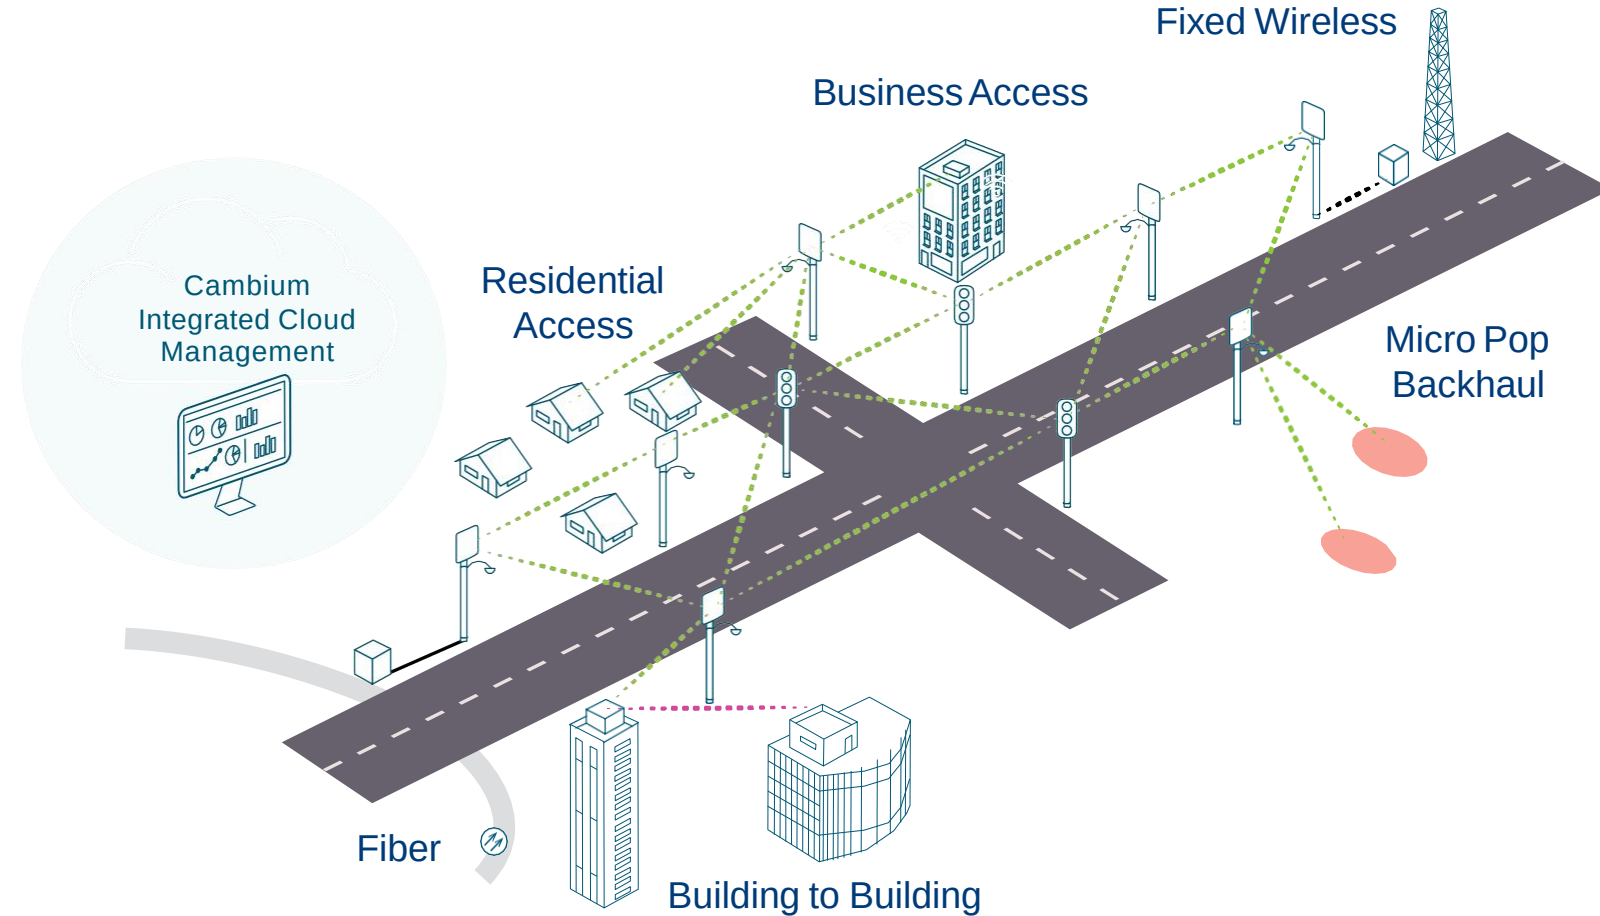

Wireless Network Fabric

- E2E Fixed Wireless Solution
- Purpose Built
- 2 m to 246 km
- Mb to Gb
- Indoor and Outdoor
- PTP PMP ePMP Wi-Fi LTE
- Licensed & Unlicensed
- Scalable
- Concept to Commissioning
- Single Management

Deployment Architecture

- **WTTH – Wireless To The Home**
 - Providing Wireless Broadband access directly to the home.
- **WTTB – Wireless To The Building**
 - Wireless Broadband access provided to rooftops or side of buildings, which then get distributed to individual offices and homes via wire.
- **RTTTRT – Roof-Top To Roof-Top**
 - Long range Point to Point with high gain dish
 - Multi Dwelling Distribution
- **Fiber Extension**
- **Backhaul** for 5G Small Cell, outdoor Wi-Fi, MicroPoP and CCTV

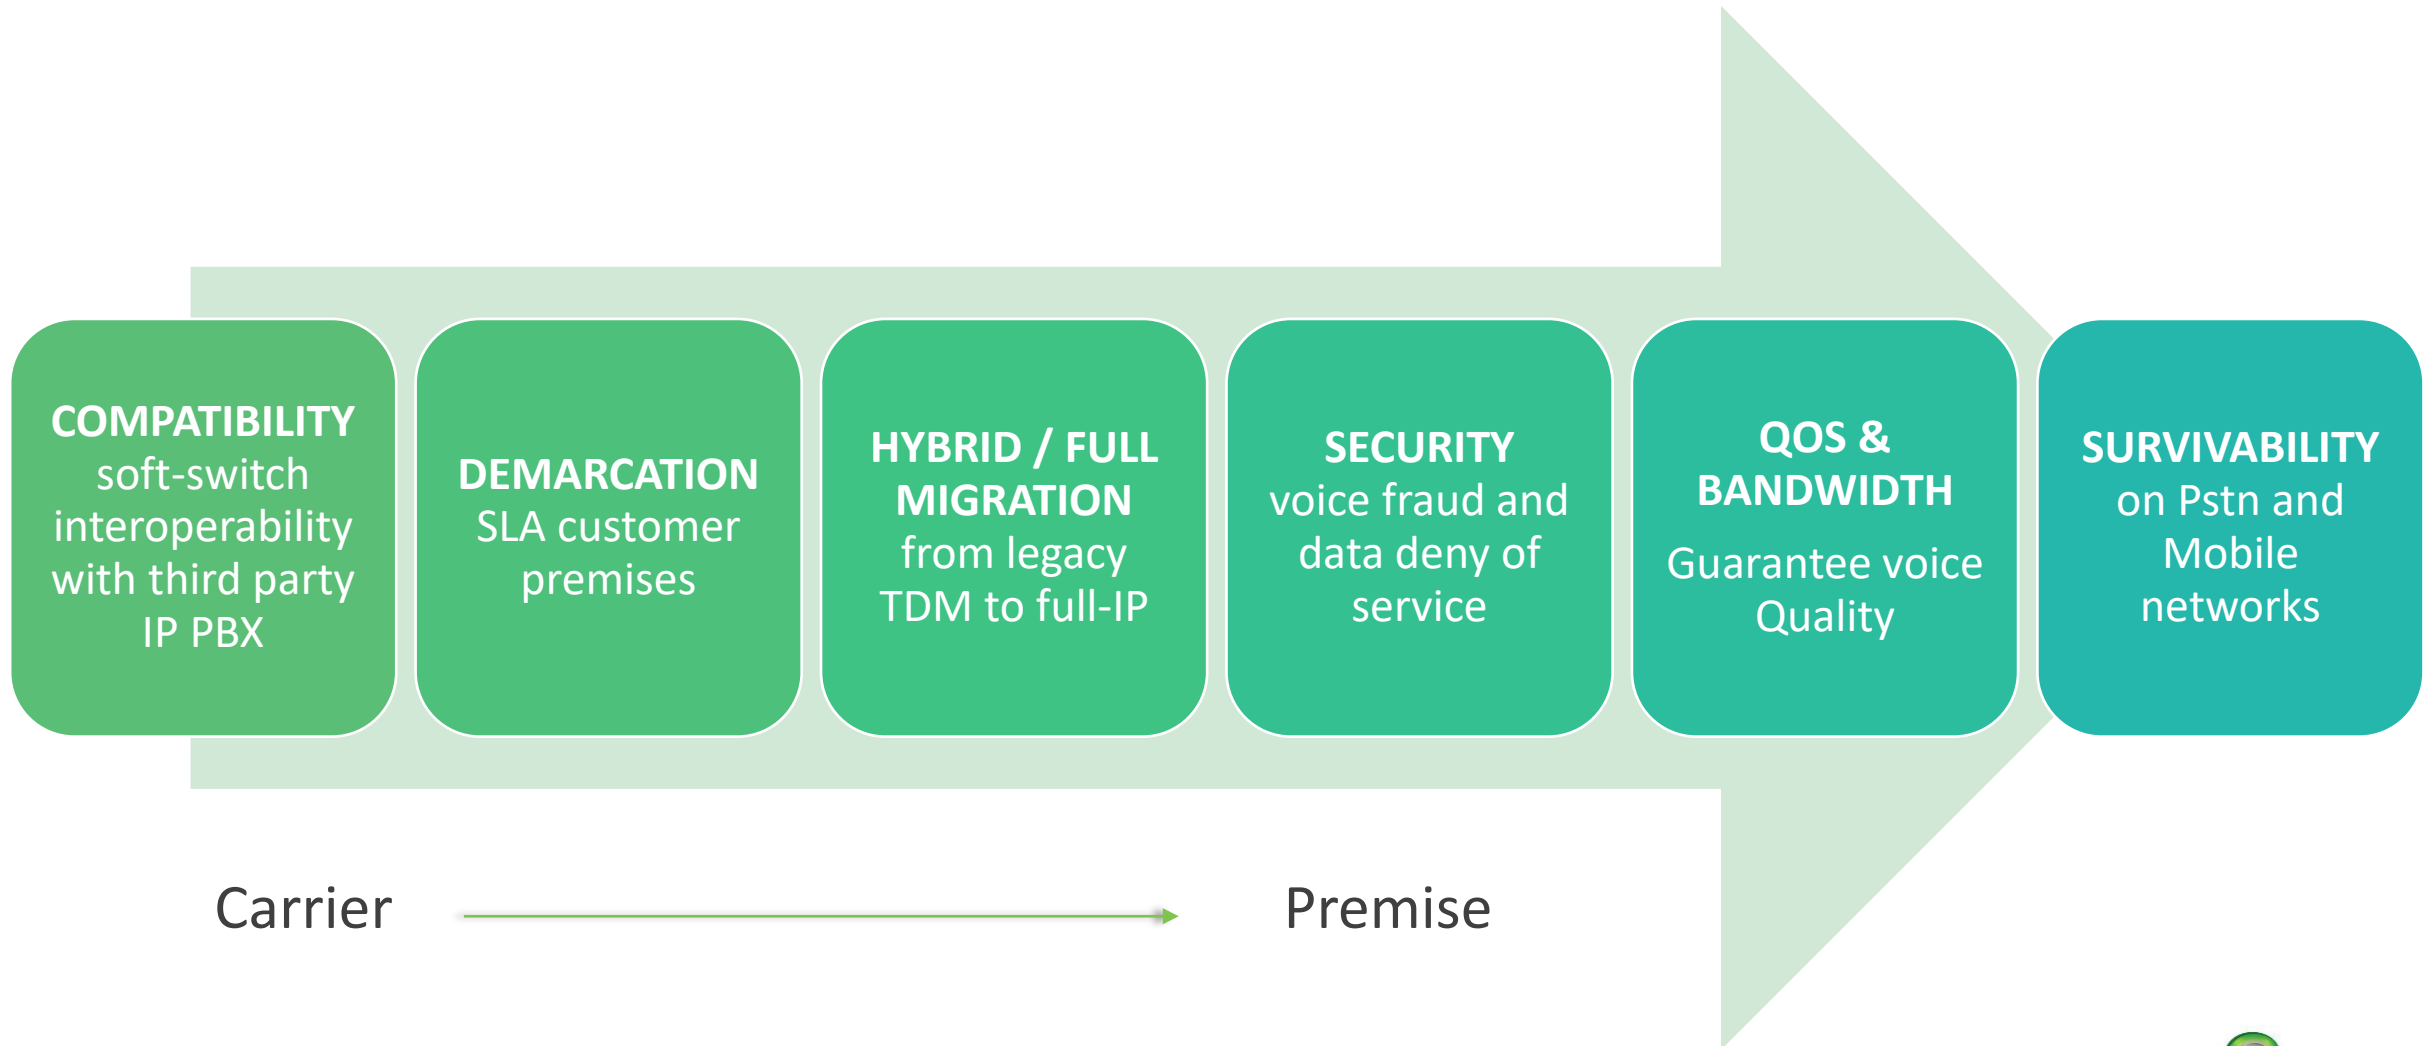

Application and Verticals

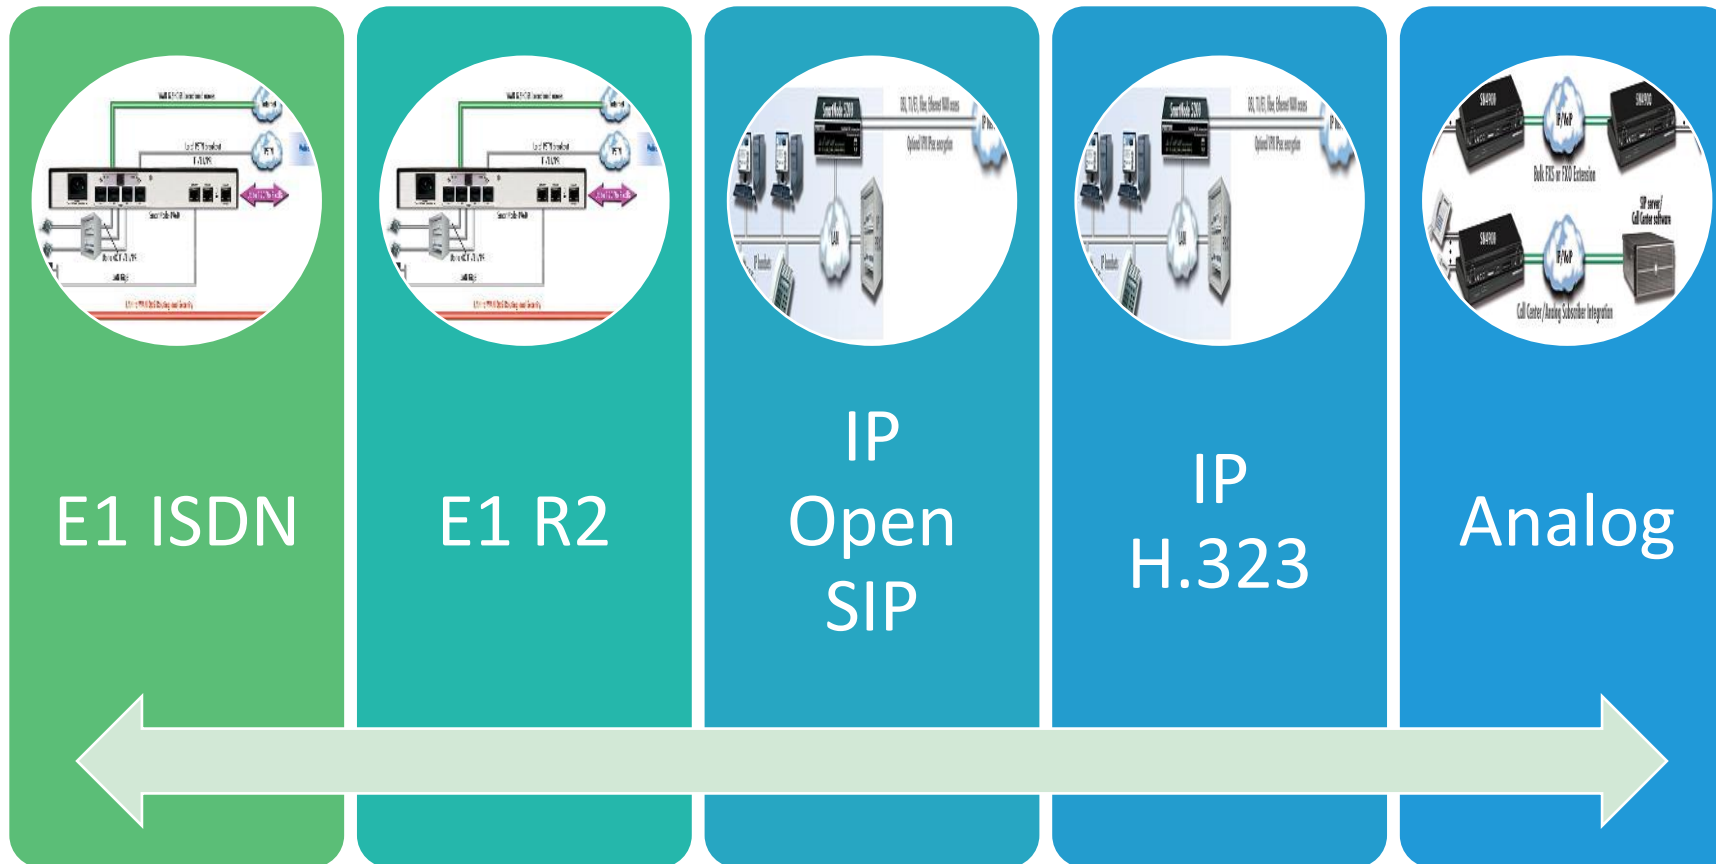

Transportation	Security	Environmental	Health Care	Services	Government
					
• Public Transportation • Traffic Management • Parking	• Public lighting • People control and management • CCTV	• Air Quality • Weather • Natural control and telemetry	• Emergency Services • Disease Control • Patient Management • Digital Patient Platforms & Services	• Intelligent Telemetry • Waste Management • Water Management	• Citizen Participation • Public WIFI • Monitoring public works and construction • Infrastructure Management

Managed UC

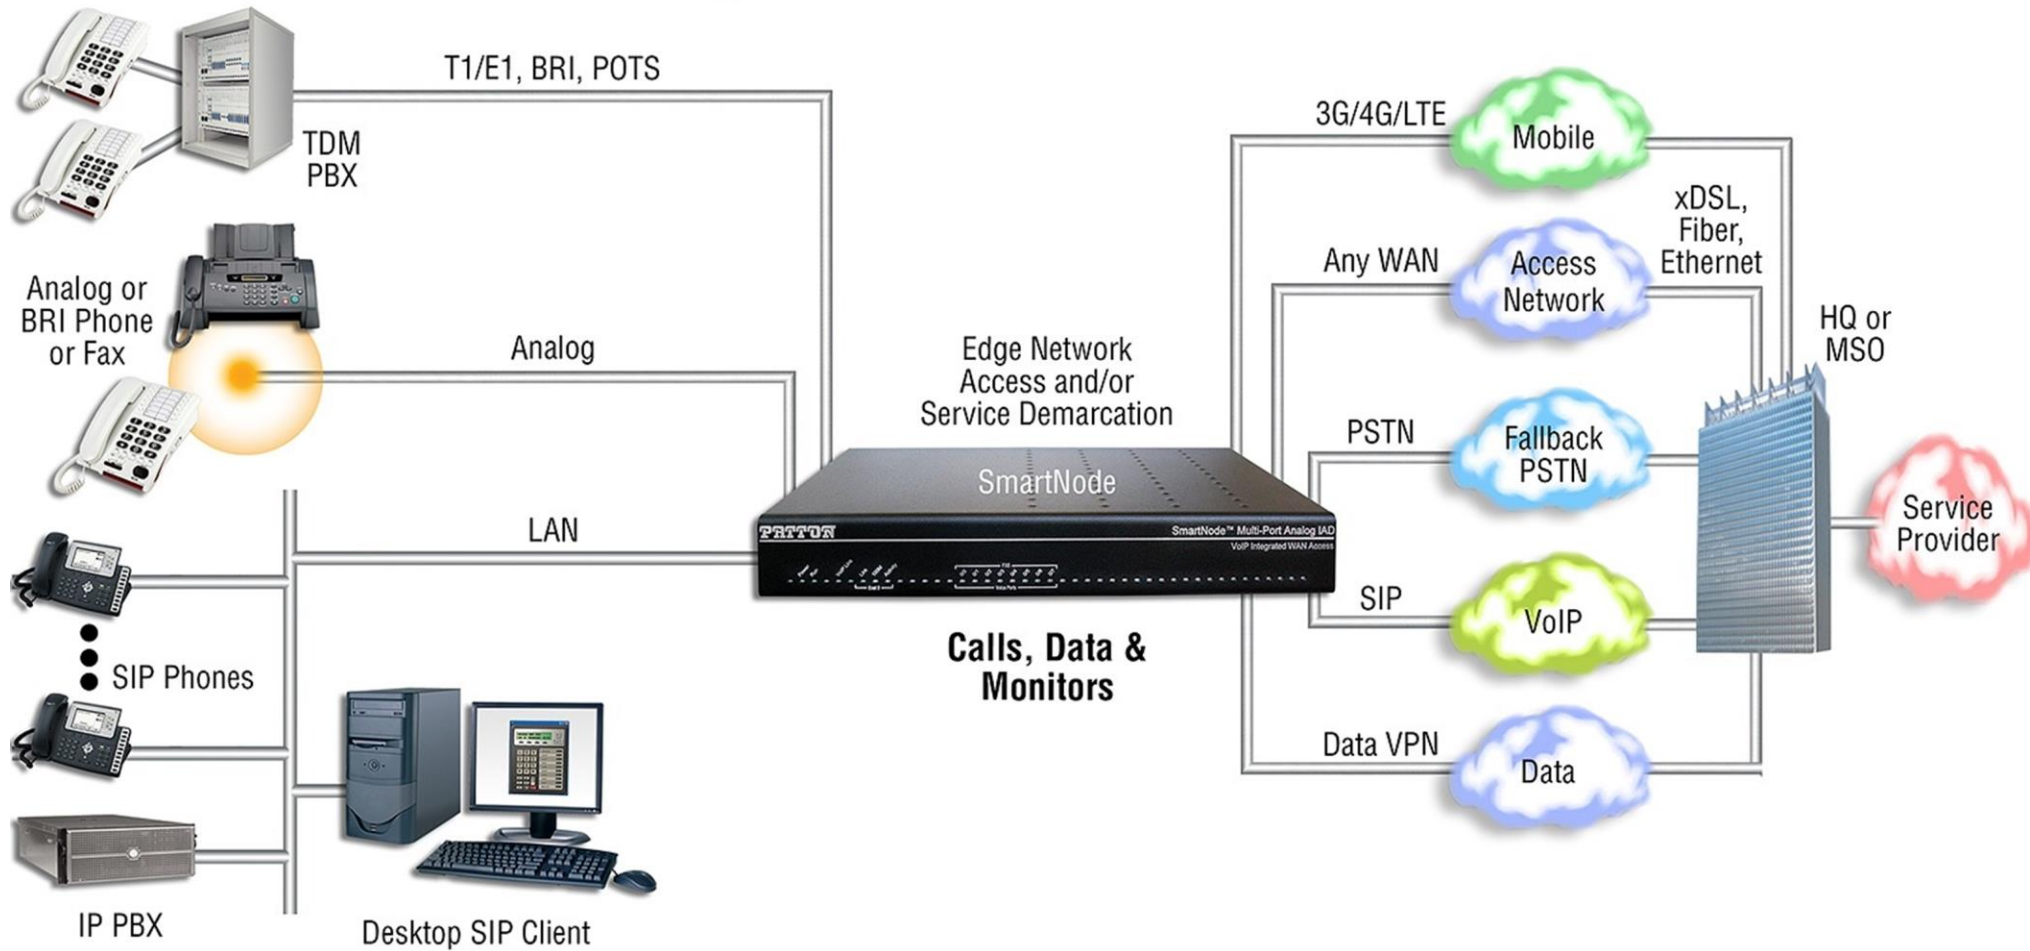

Today's SIP Full IP challenges

htc Let the customer choose Strategy

Flexible Solution

UC Managed Application

- Build internal Network and WIFI
- UC Edge Devices must connect to the Internet or a Private IP Network.

TELEPHONY (VoIP)

- ▶ Phones
- ▶ Speakers
- ▶ Call boxes & intercoms

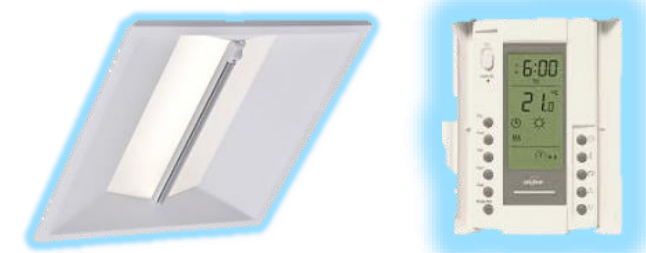

SECURITY

- Cameras
- Sensors
- Keypads

BUILDING AUTOMATION

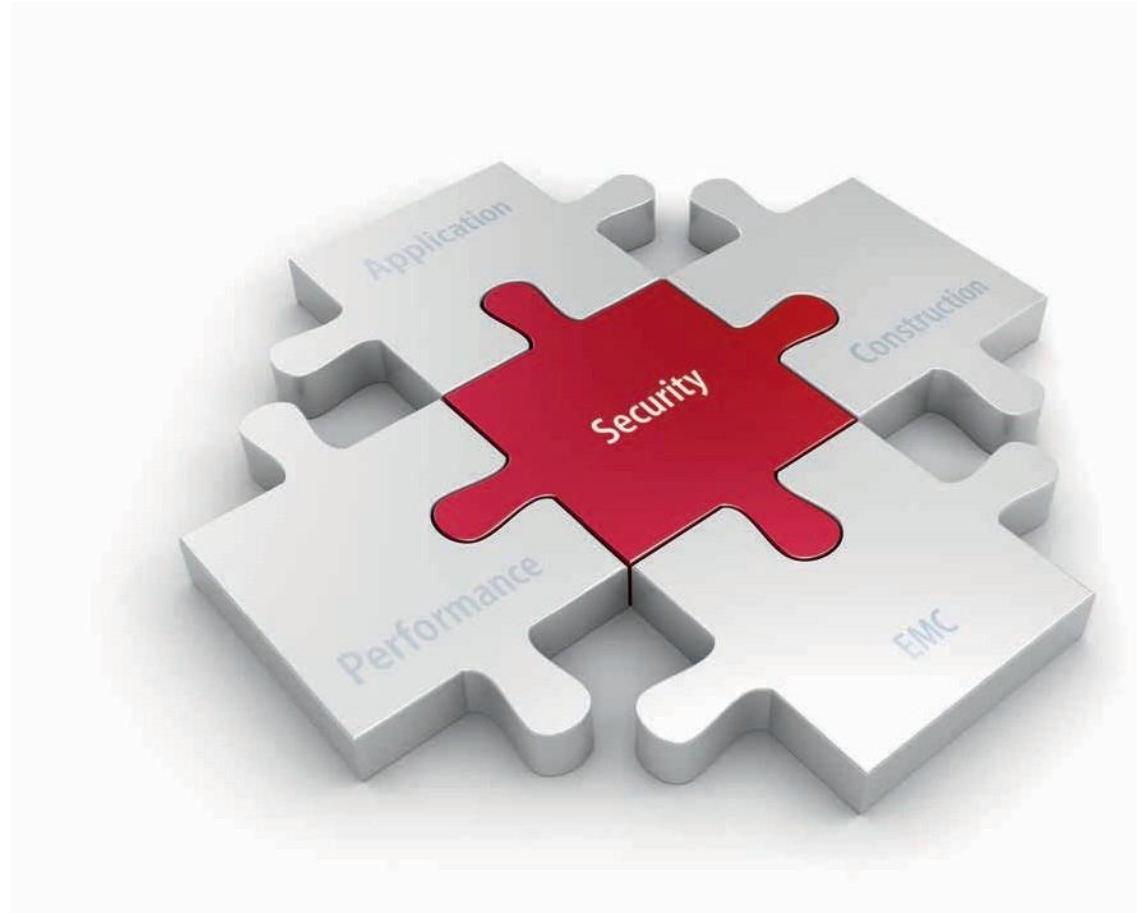

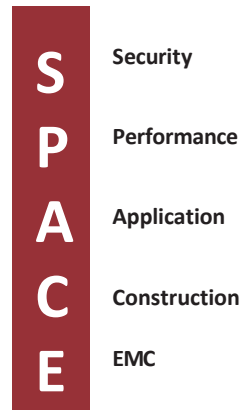

- HVAC Controller
- Thermostats
- Lighting Control & Lighting

Infrastructure

SPACE concept

Finding the right data cable

SPACE matrix

Example of a data cable with the code **S₃P₄A₄C₅E₅** :

S₃ It passes the fire test according to IEC 60332-3-24
(Security Level **3**)

P₄ It meets the minimum requirements of the Class F_A
(Performance Level **4**)

A₄ It is dimensioned for applications with more than 10
GbE (Application Level **4**)

C₅ It consists of a conductor with AWG22 (Construction Level **5**) and thus has low attenuation values and an increased max.
current

E₅ The coupling attenuation is >80 dB (EMC Level **5**)

Security (fire behaviour)

S	1	2	3	4	5
	IEC 60332-2-2	IEC 60332-1-2	IEC 60332-3-24	EFP Grade 1	EFP Grade 2

Performance (cabling class, bandwidth)

P	1	2	3	4	5
	> Class E > 250 MHz	> Class E _A > 500 MHz	> Class F > 600 MHz	> Class F _A > 1000 MHz	> Class "G" > 1200 MHz

Application (Ethernet,TV)

A	1	2	3	4	5
	> 100 MbE	> 1 GbE	Up to 10 GbE	> 10 GbE	> 10 GbE TV

Construction (conductor dimensions, tensile strength)

C	1	2	3	4	5
	AWG 27	AWG 26/25	AWG24	AWG 23	AWG22

EMC (coupling attenuation)

E	1	2	3	4	5
	> 40 dB	> 50 dB	> 60 dB	> 70 dB	> 80 dB

Solution Speed

Unshielded
1 Gbit/s

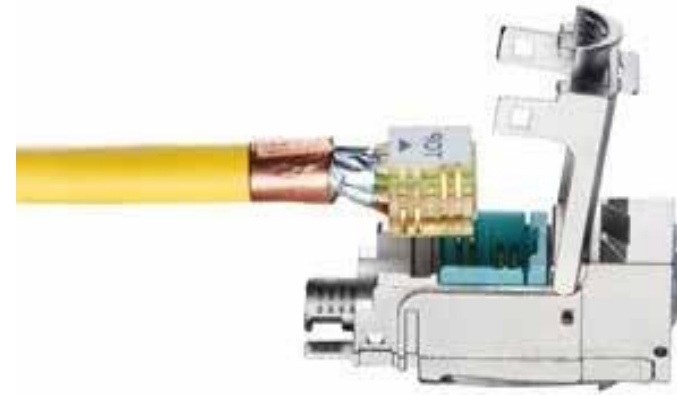

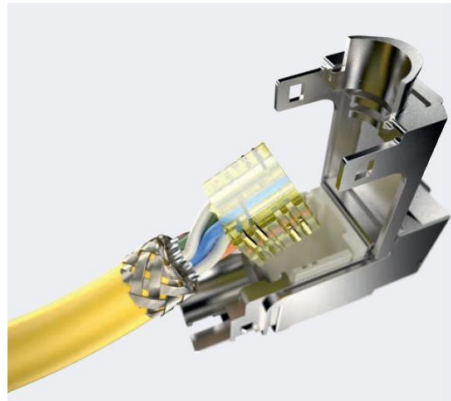

Shielded
10 Gbit/s

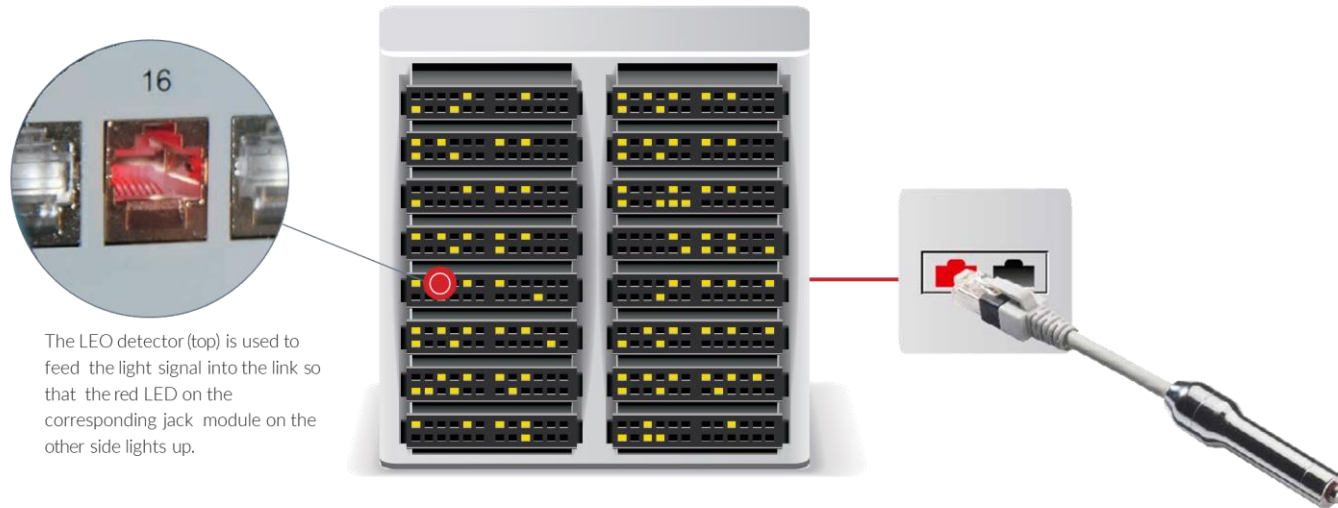

Shielded
40 Gbit/s

Easy 1 2 3 Assembly

Copper LEO (Light Emitting Outlet)

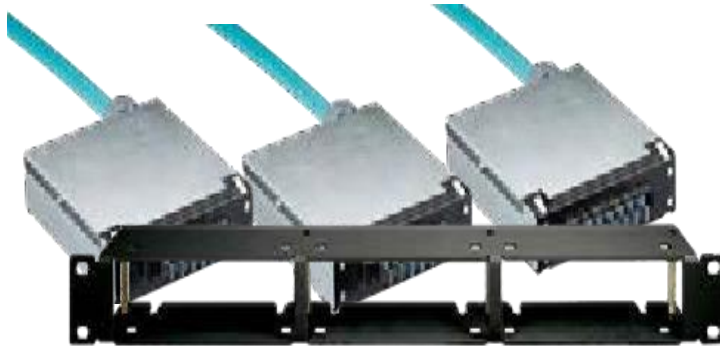

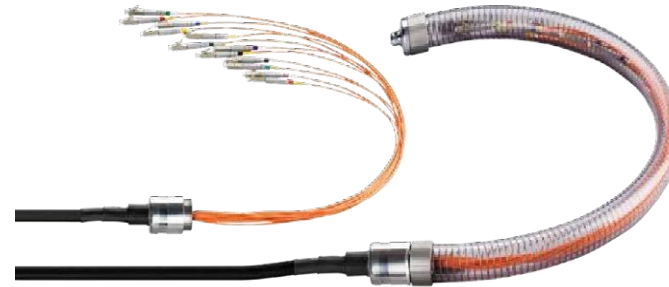

The LEO detector (top) is used to feed the light signal into the link so that the red LED on the corresponding jack module on the other side lights up.

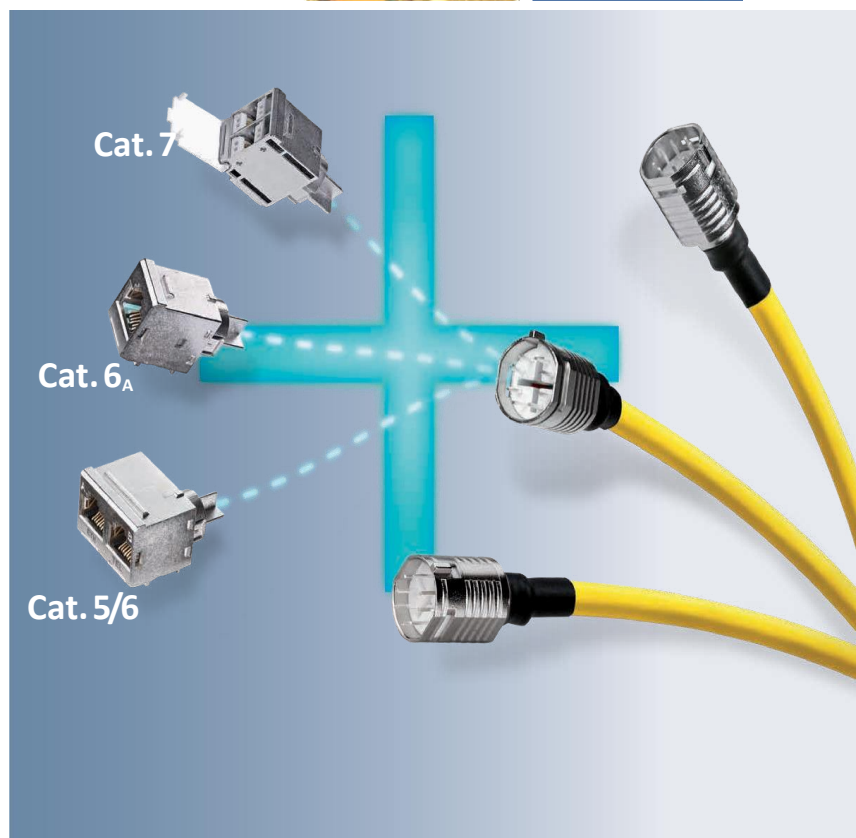

Data Center

Easy to Organize

Industrial

Special MODA Solutions

Change the Media

We provide solution which cover different customer infrastructure fiber or copper (CAT6 or CAT3).

Change the interface

Our solution work with different type of interface depending on the application starting from the legacy interfaces as E1, STM1, DS3, RS232 ending with Ethernet and optical

Change the signal

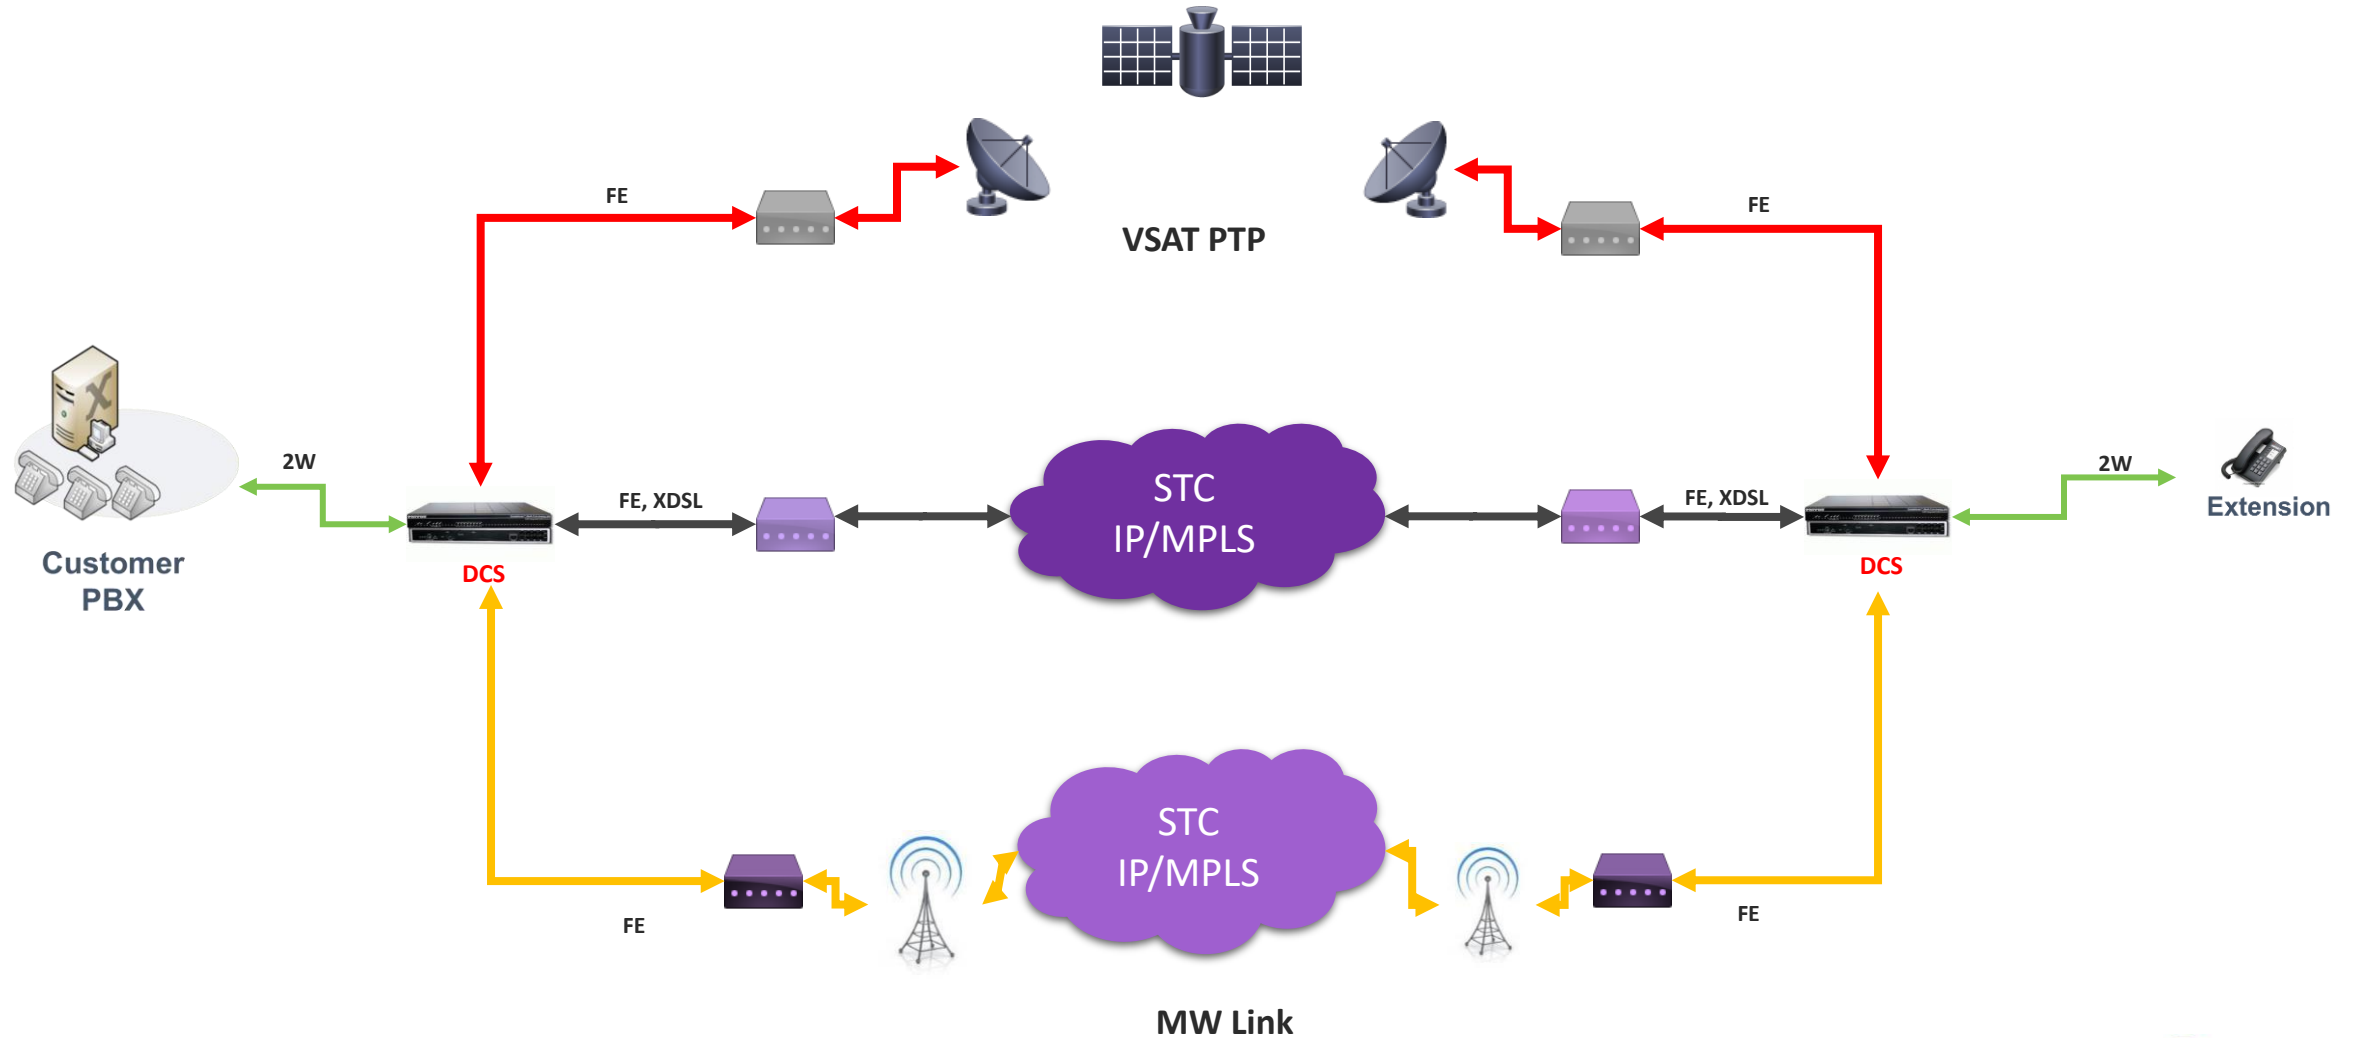

Signalling conversation could be very tricky adapt customer situation weather it is IP or legacy protocol or RTP signalling

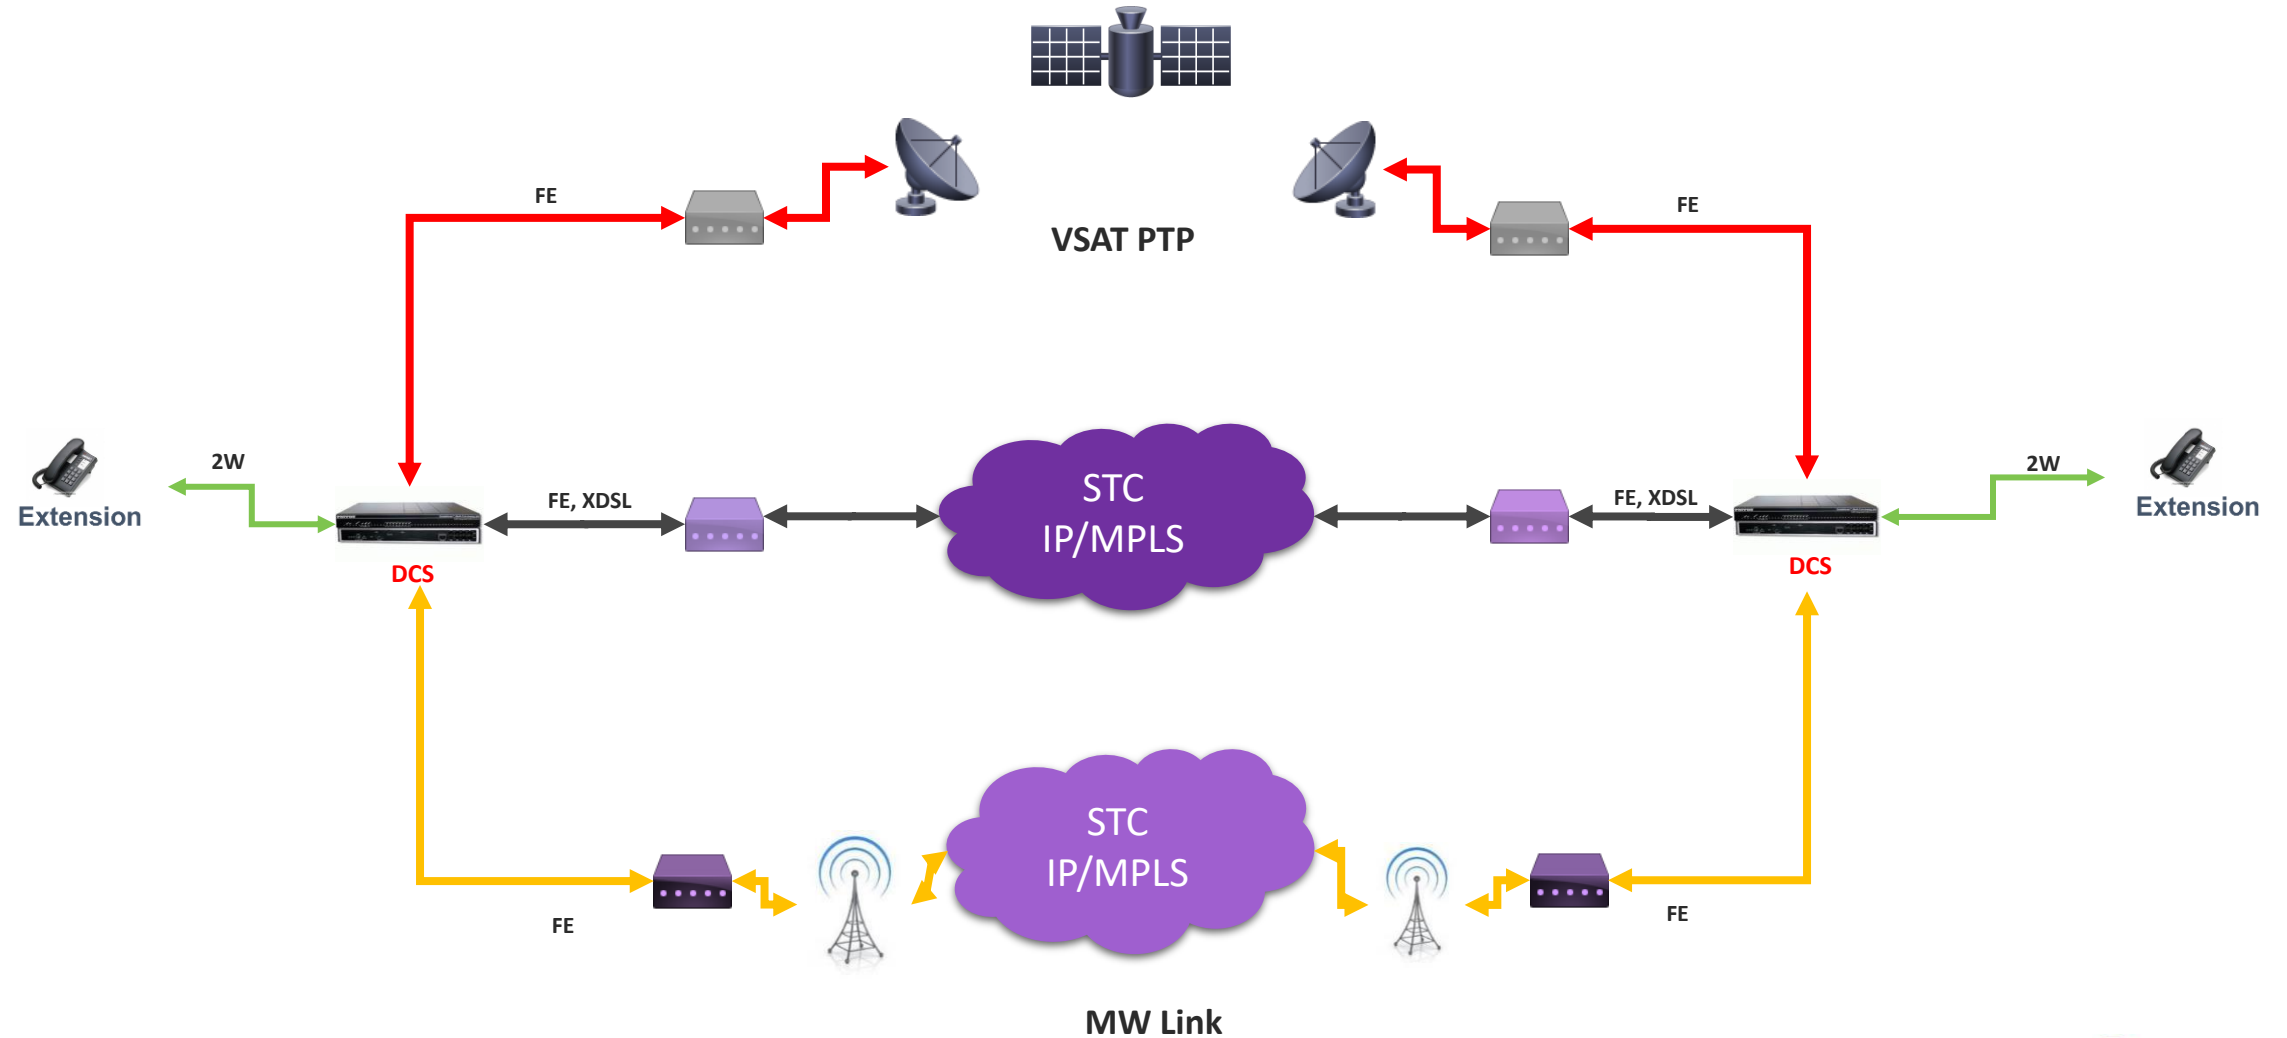

Flexible, resilience and secured

Our solution can accommodate different uplinks IP/MPLS, MW and or VSAT, with end to end security plus resilience and failover seniors

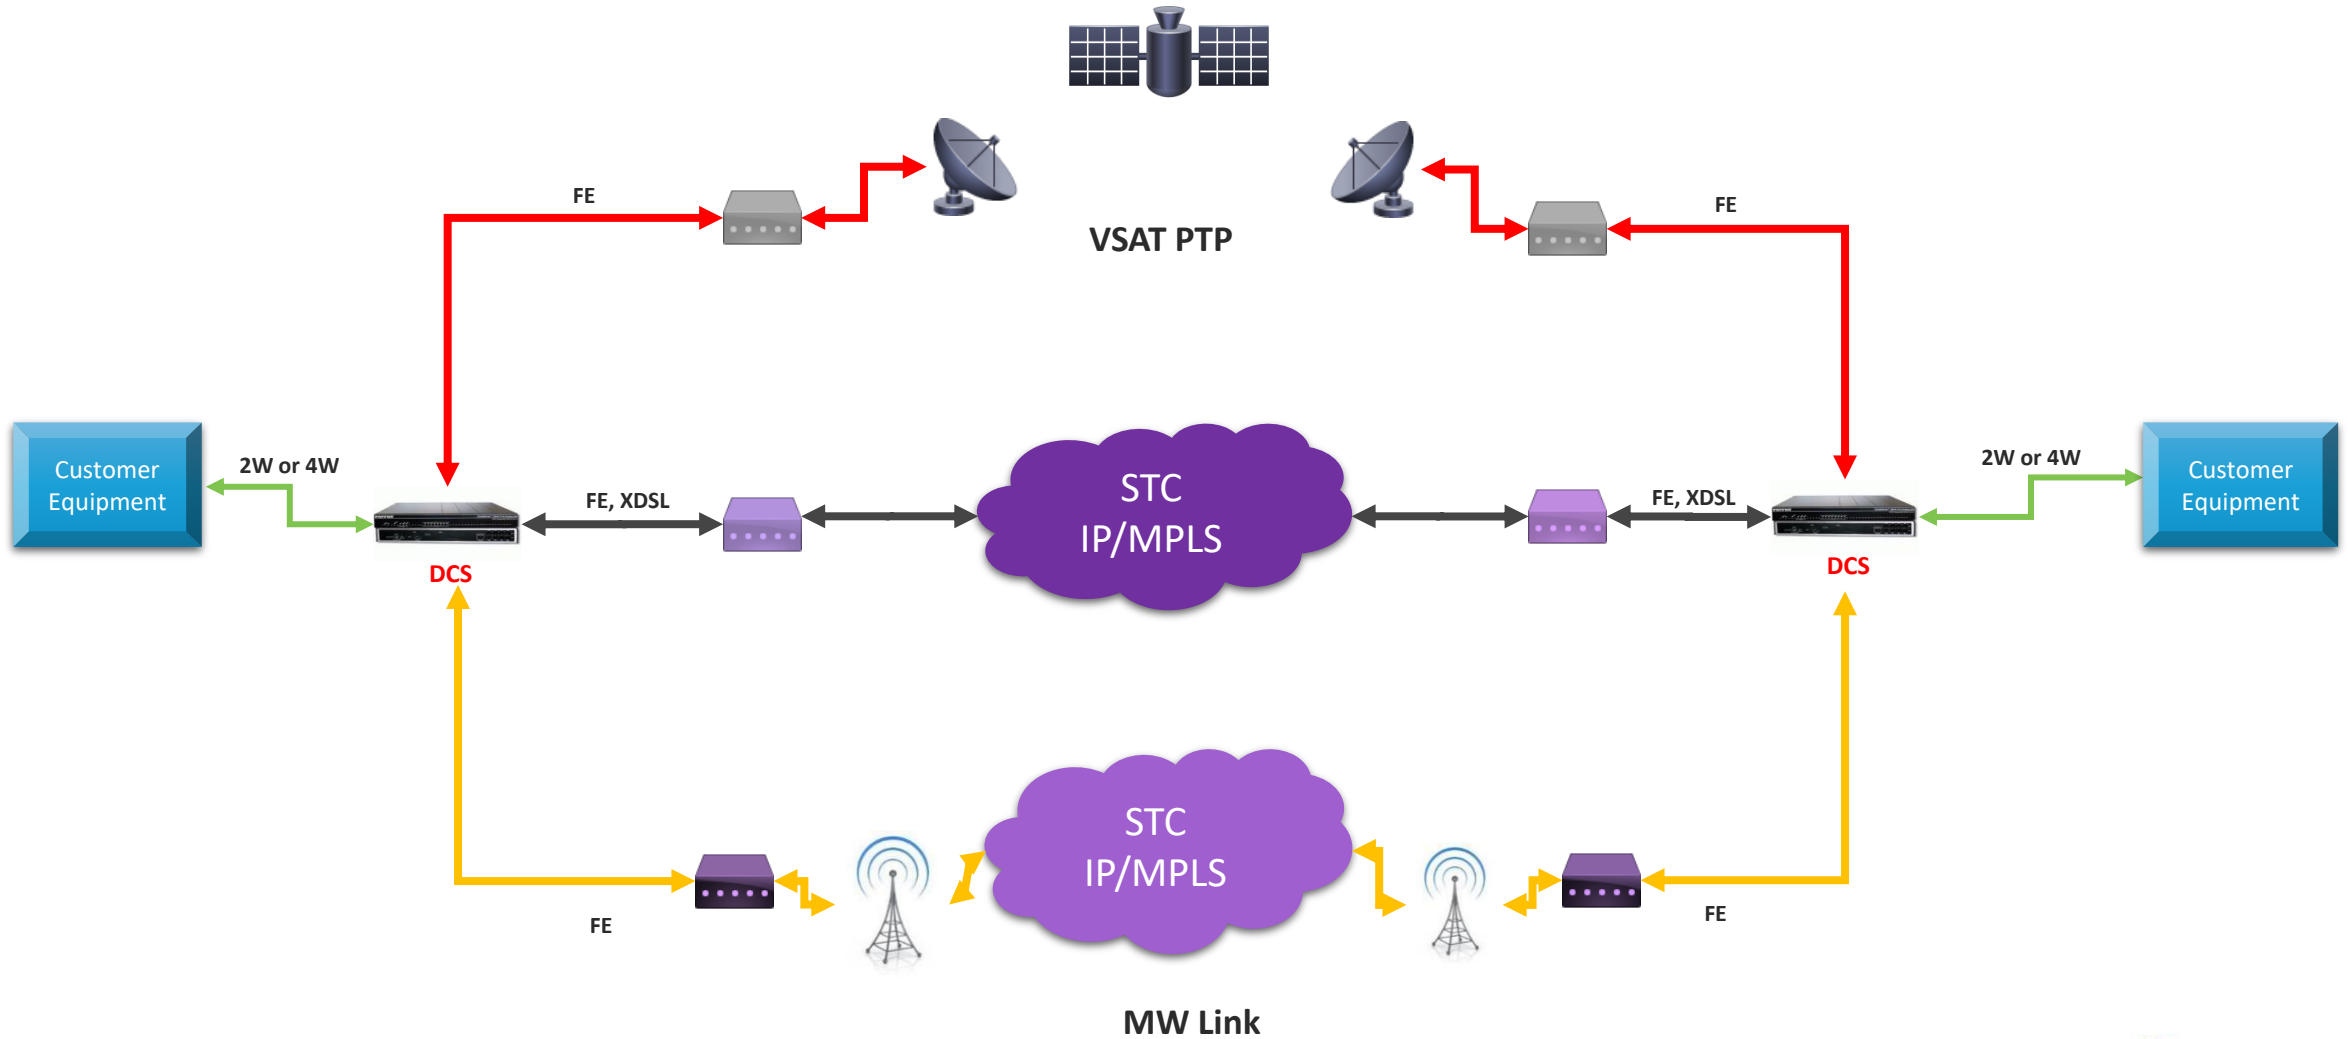

DC NOPX Service

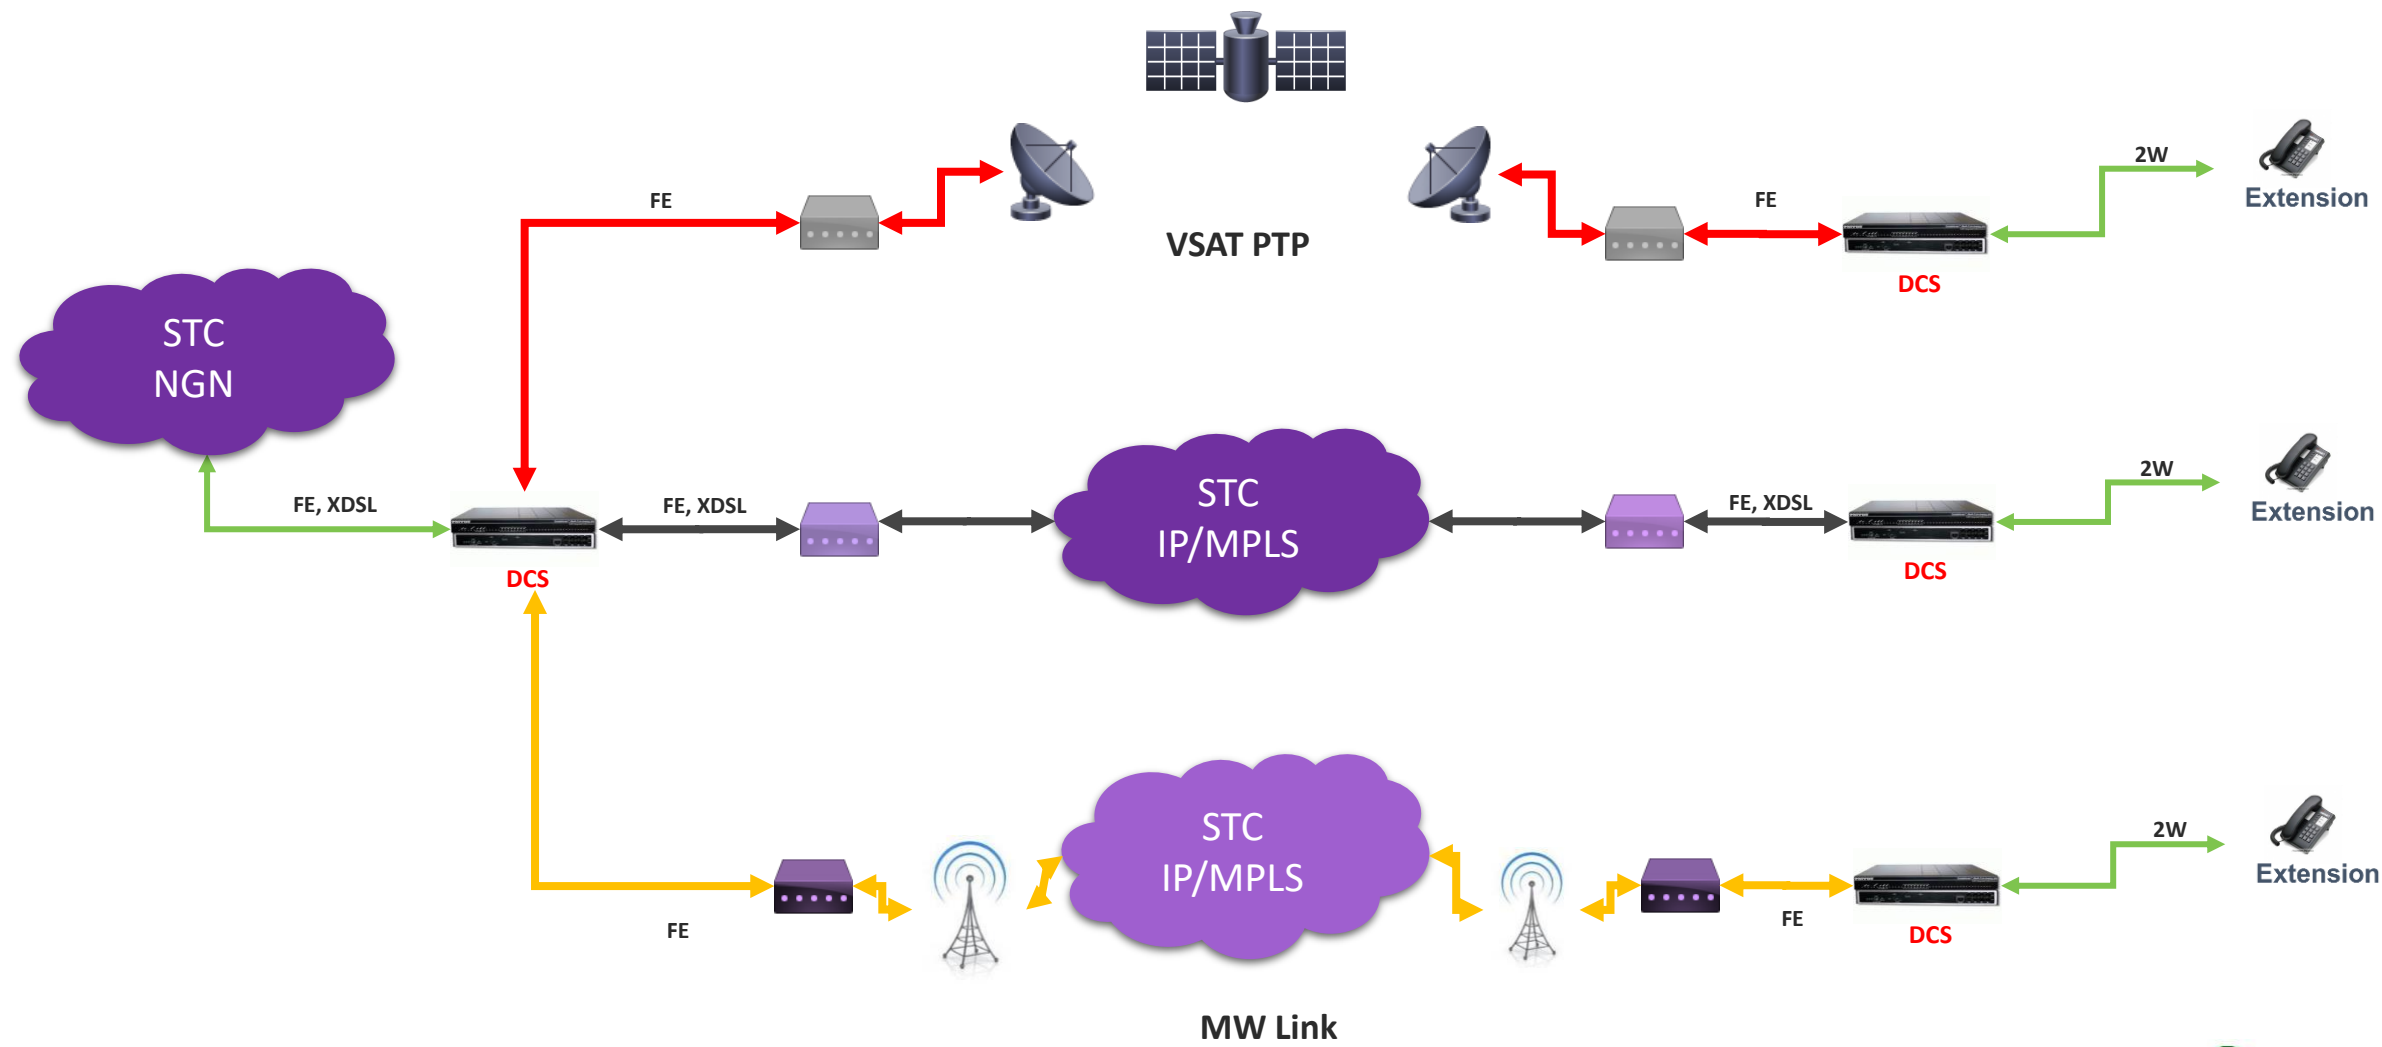

DC Hotline Service

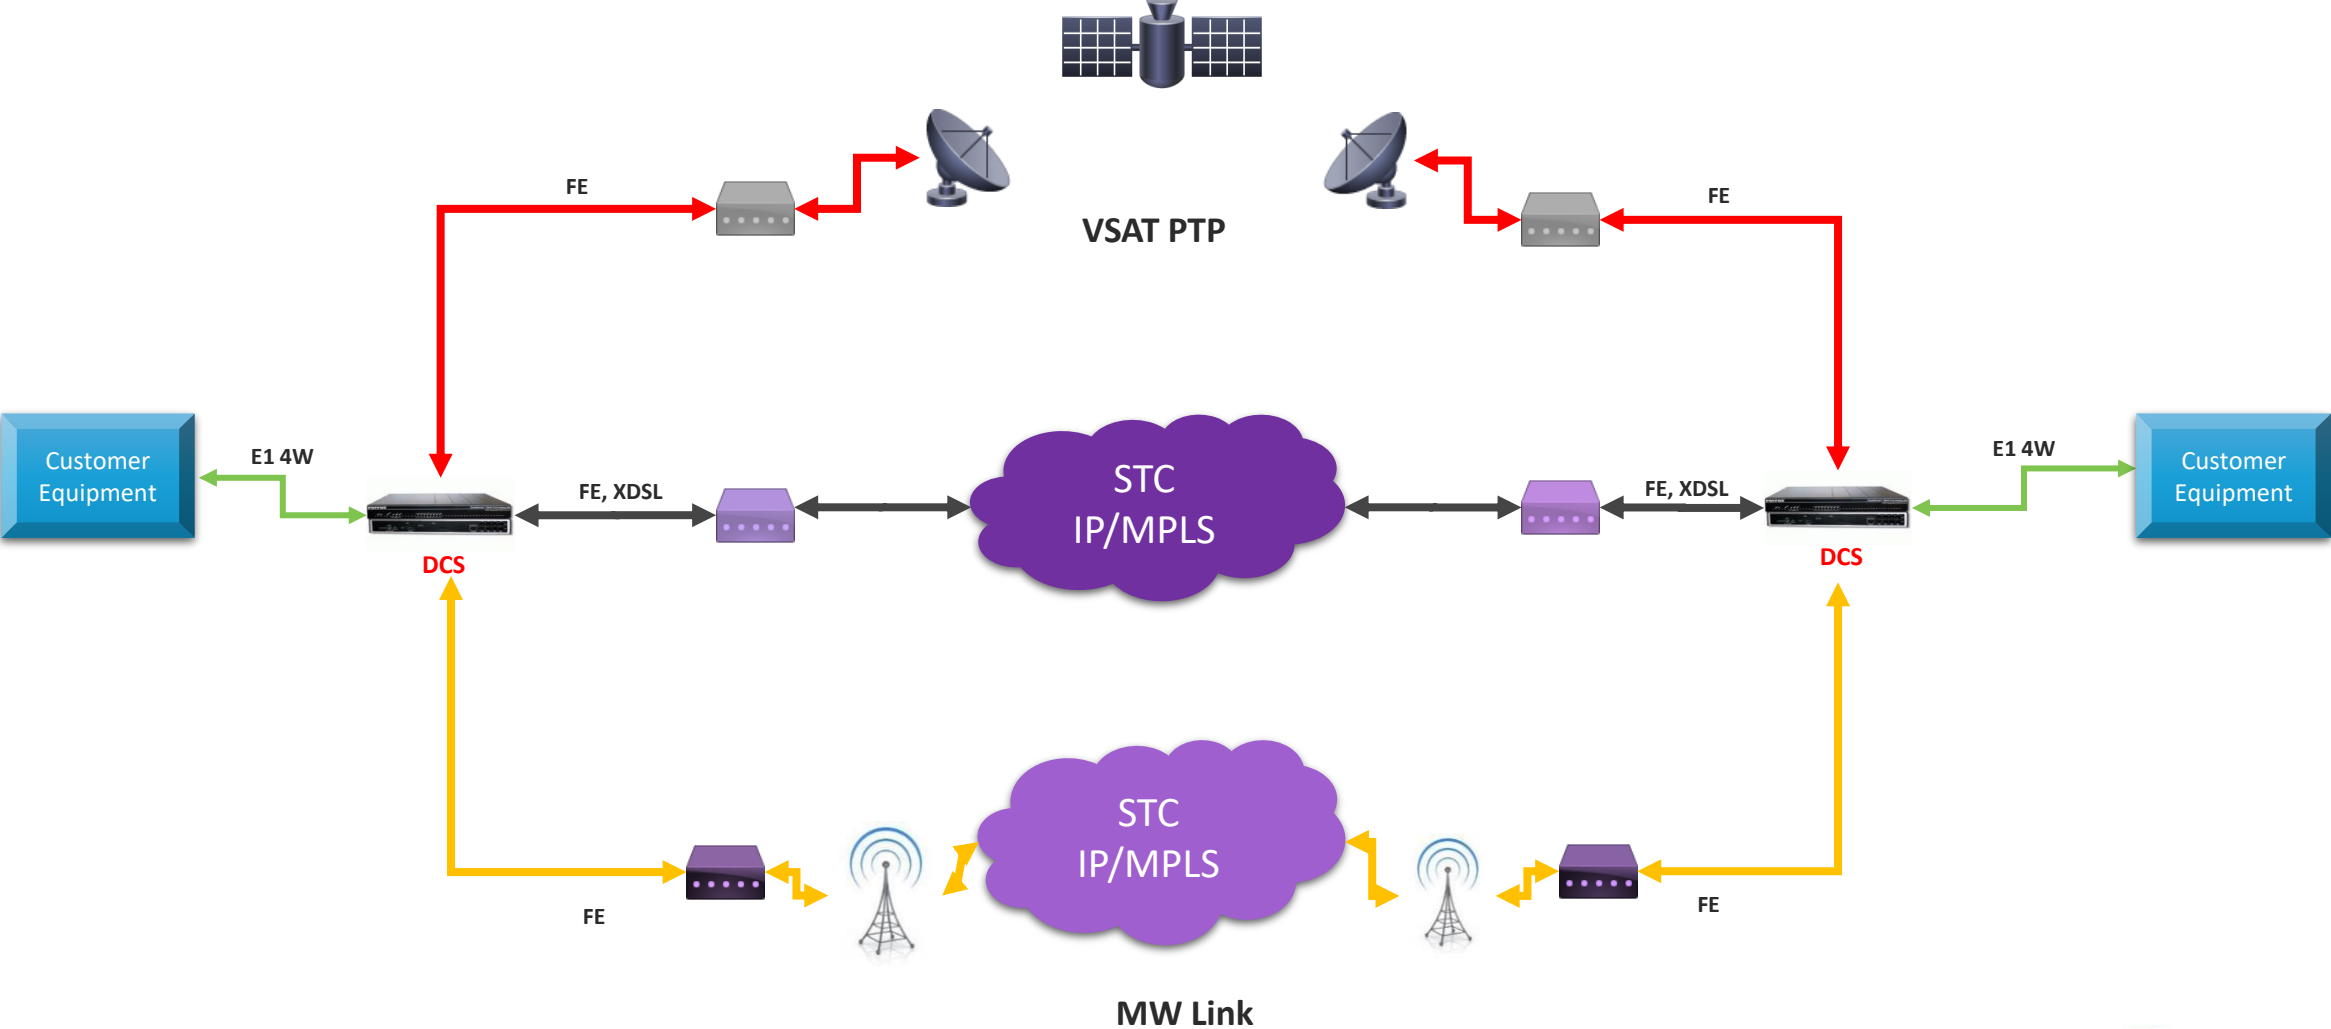

DC NALL Service

DC SIP Distribution Service

DC Transparent E1 Service

Customer Need

Always looking for one place to get it ALL

E2E Solution

Workable E2E solution.

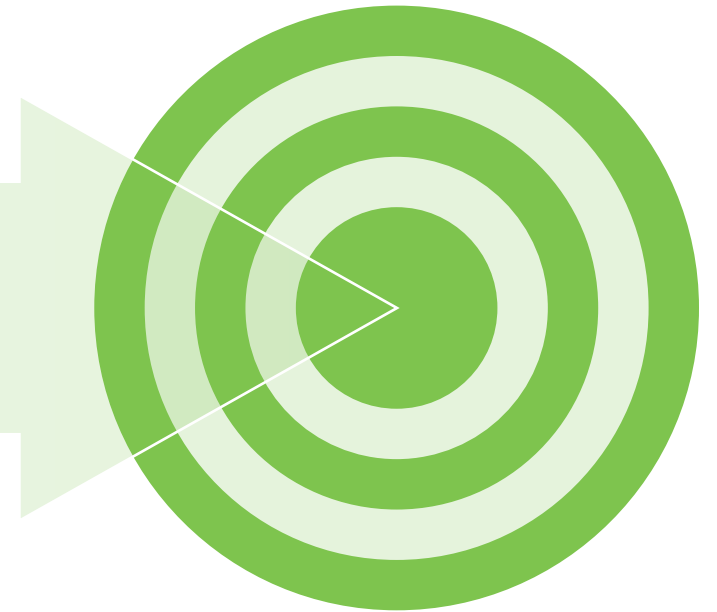

Single interface

One place to communicate
and invoice.

Support

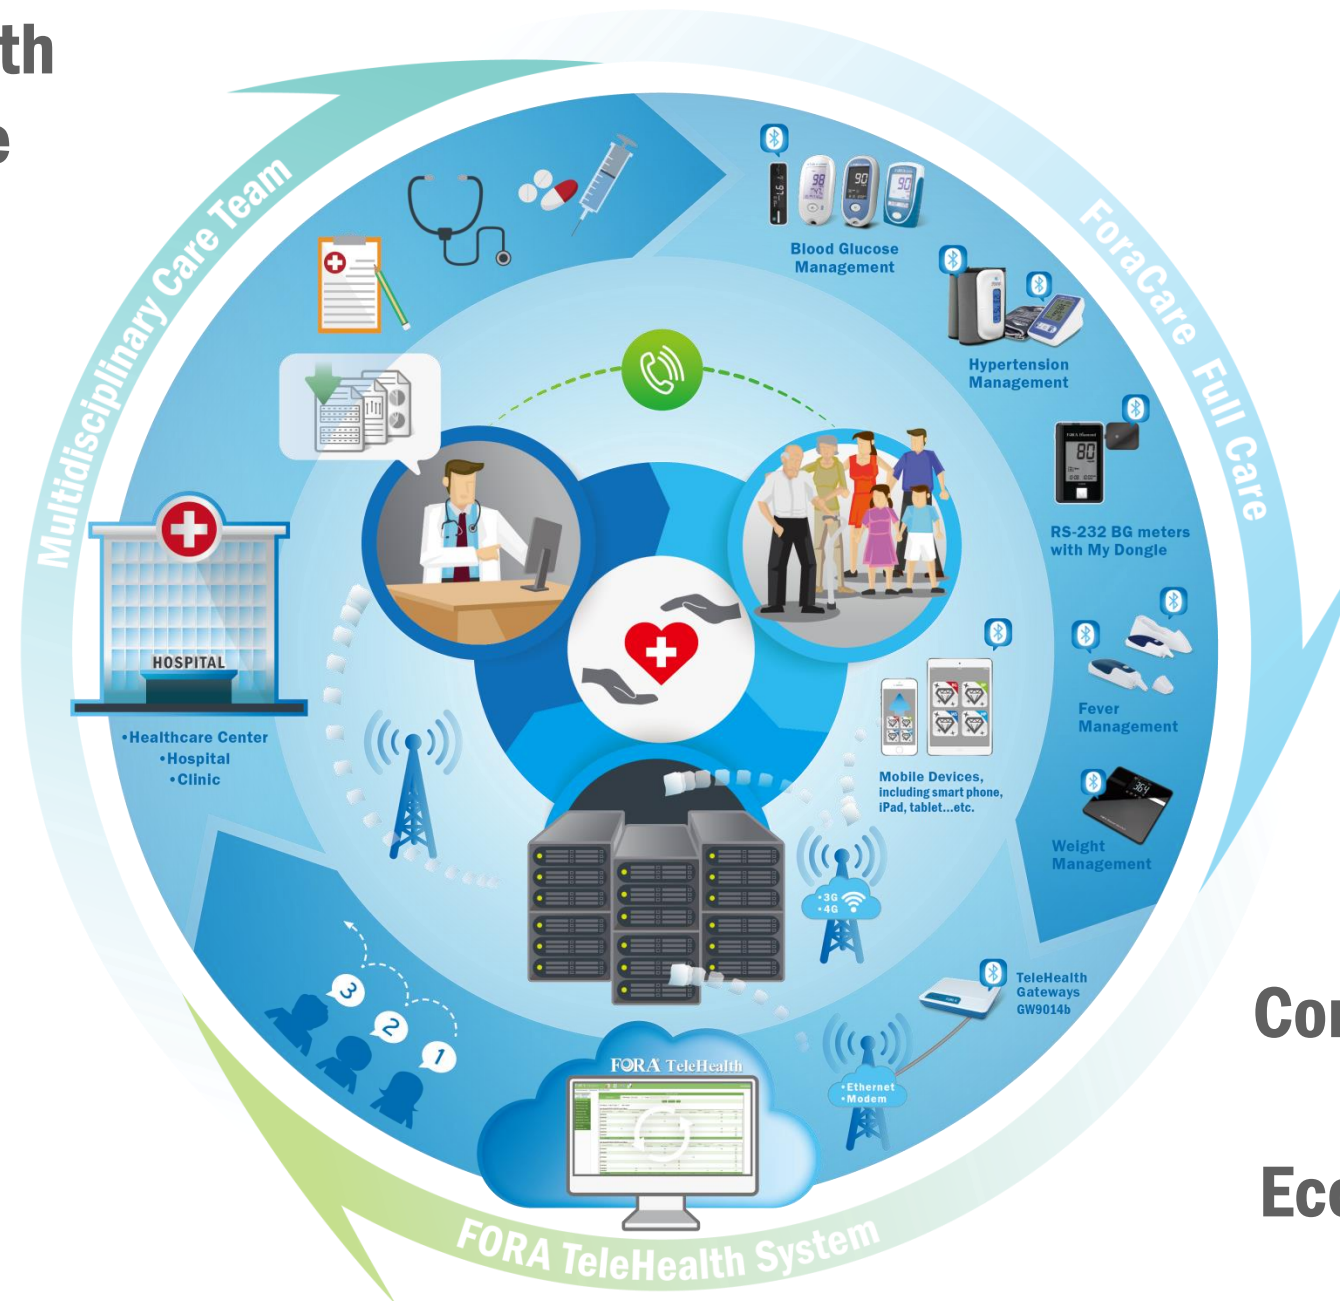

Reliable support in one place
